

Modern Software Built with Intelligence at the Core

Universole App Studios is a Pennsylvania-based creative software studio that combines design, code, and intelligence. We deliver AI chatbots, voice agents, mobile and web applications, and business automation systems — using AI-native workflows that ship faster and at lower cost than traditional government contracting firms. Since 2021, we have shipped 10+ live production systems serving real users across food safety compliance, workforce platforms, consumer marketplaces, and AI tooling.

CORE CAPABILITIES

AI Chatbots

- 24/7 automated support, NLP, knowledge base training
- Multi-channel: Web, Slack, SMS, WhatsApp

AI Voice Agents

- Automated phone support, scheduling, outreach
- Natural-sounding conversational AI

Mobile Applications

- Native iOS (Swift) and Android (Kotlin)
- Cross-platform via React Native / Flutter

Web Applications & SaaS Platforms

- Full-stack platforms with auth, payments, admin tooling
- Modern stack: React, Next.js, Node.js, Supabase

Business Process Automation

- Workflow automation with LLM-powered intelligence
- Compliance, scheduling, reporting, and data sync

DIFFERENTIATORS

- **End-to-End Builds:** One team from concept to launch — no handoffs, no integration drag
- **AI-Native Workflows:** Intelligence built into our delivery process, not bolted on as an afterthought
- **Fast Iteration Cycles:** Ship in weeks, not months — small team, no bureaucratic overhead
- **Cost-Competitive:** Premium builds without enterprise overhead — lower delivery cost than traditional primes
- **Proven in Production:** Live multi-site systems with real users — not just demos or prototypes
- **White-Label / Teaming Ready:** Available for subcontract or teaming with primes — we stay invisible if preferred

PAST PERFORMANCE (COMMERCIAL)

Project Type	Description
Multi-Site Compliance Platform	Production food-safety compliance system across 7 retail sites; offline-capable mobile data capture, real-time HACCP violation monitoring, regulator-ready reporting
Regional Workforce Platform	Candidate and employer-facing web platform with formal scoping and proposal documentation
Full-Stack Web + Mobile Product	Production web platform paired with native React Native mobile companion app
AI Tooling & Agent Automation	Internal AI development platform and LLM-powered automation systems
Additional Commercial Work	10+ shipped products across SMB sites, vertical directories, and consumer marketplaces since 2021
